PROFESSIONAL SUMMARY

Product Designer with 4+ years specializing in UI/UX and product design, backed by 8+ years of professional design experience. End-to-end experience across product discovery, user research, user flows, information architecture, interaction design, high-fidelity UI, prototyping, design systems, developer handoff and post-launch iteration. Nearly four years as the sole designer on a live B2B operations product used daily by 20+ staff, with experience solving complex workflows in ambiguous, resource-constrained environments.

CORE SKILLS

Product & UX Strategy: Product discovery, problem framing, user research, field research, stakeholder interviews, user flows, journey mapping, information architecture, workflow mapping, heuristic evaluation, competitive analysis

UI & Interaction Design: Wireframing, interaction design, high-fidelity UI, responsive design, dashboard design, design systems, components, variants, variables, prototyping, accessibility-aware design

Delivery & Collaboration: Developer handoff, cross-functional collaboration, design documentation, working with engineers, post-launch iteration, design reviews, leading without authority

Product Domains: B2B, ERP, operations, SaaS, web applications, mobile products, e-commerce, AI-powered experiences

Tools: Figma, Adobe Illustrator, Adobe Photoshop, Adobe InDesign, Canva, Microsoft Office, ChatGPT, Claude, Google Stitch

PROFESSIONAL EXPERIENCE

UI/UX and Graphic Designer | VIXII (Dawn Haven Jewellery Private Limited)

VIEW PROJECT ↗

Jun 2026 - Oct 18, 2026 | Remote

- Design mobile, web, and packaging experiences for a UK-based demi-fine jewellery brand, working directly with the founding team on end-to-end design execution across digital and product touchpoints.
- Design mobile and web UI across customer-facing product surfaces, translating business requirements into responsive interfaces and reusable design patterns.
- Design AI-powered experiences including a shopping concierge and post-sales AI support, plus AI-generated video and animation for Kira, the brand's virtual tiger mascot.
- Shape digital and physical brand touchpoints, including packaging, pop-up store design, emailers, and e-vites, while maintaining a cohesive premium brand system.
- Process and prepare product imagery for e-commerce partnership listings, ensuring consistent presentation across partner channels.
- Refine website content by condensing dense copy into shorter, scannable content while preserving brand voice, clarity, and readability.
- Own design execution end-to-end from concept through delivery in a fast-moving, founder-led environment.

Product Designer & Systems Lead | OMAF Water - Uzbekistan

VIEW CASE STUDY ↗ | VIEW WIREFRAMES ↗

Jan 2022 - Dec 2025; Jan 2026 - Apr 2026 continued engagement | On-site / Remote

- Helped digitize a packaged drinking-water plant, translating pen-and-paper operations into requirements and workflows for a live web admin panel and companion mobile product used daily by 20+ staff.
- Studied factory operations through worker conversations, floor observation and physical log reviews to understand inventory, production, sales and accounting needs.
- Mapped workflows for plant managers, floor supervisors, sales executives and accountants, accounting for their distinct responsibilities and information needs.
- Defined product logic and operational flows for production, inventory, sales and accounting, and created wireframes to communicate requirements and screen structure to developers.
- Collaborated with developers to explain workflows and validate implementation, working through language and resource constraints; supported staff onboarding and training.
- Trained 20+ staff and conducted post-launch audits. The system remains in daily use and has processed 3,500+ invoices while tracking 3B+ UZS in customer balances.

SELECTED PRODUCT DESIGN & UX WORK

1. Hoomanely — Product strategy and activation

Product redesign focused on activation and community participation. Examined the gap between app installs, account creation and community usage; proposed a clearer onboarding journey, simpler sign-in and stronger community discovery and participation flows.

Work samples: Figma project | Behance case study

2. Easy Order — Multi-role operational workflows

Restaurant dine-in and hotel room-service ordering experience. Structured connected workflows across guests, front-of-house, kitchen, expo and runners, including order states, handoffs, KDS, shared carts and allergy handling.

Work samples: Figma project

3. Smart Food Safe — B2B SaaS and dashboards

Supplier food-safety query portal for a SaaS quality-management product. Designed the end-to-end supplier query flow across four core screens, with six reusable component systems and supporting UX rationale; completed in seven days.

Work samples: Figma project | Behance case study

4. VIXII — Commercial UI and e-commerce

Professional engagement for a UK demi-fine jewellery brand, including a full Shopify storefront revamp, responsive shopping journeys, AI shopping-concierge and post-sales support concepts, and connected digital and physical brand touchpoints.

Work samples: Figma project

5. OMAF ERP — Real-world product ownership

Live B2B manufacturing operations product. Mapped workflows for plant management, production, inventory, sales and accounting; translated operational requirements into product logic and wireframes for developers. Supported rollout, staff training and post-launch audits. Used daily by 20+ staff; processed 3,500+ invoices and tracked 3B+ UZS in customer balances.

Work samples: Behance case study | Figma wireframes

6. Sahi — Product architecture and complex UX

Self-initiated school-review platform concept spanning discovery, verified anonymous reviews and complaint management. Designed a 20+ screen PWA with four role contexts, identity verification, trust and safety logic, and role-based journeys.

Work samples: Figma project | Behance case study

7. Webomindapps — Responsive web and AI-assisted design

Agency landing-page redesign focused on service discovery, clear storytelling, progressive disclosure and conversion. Documented wireframing, AI-assisted exploration, responsive behavior and final design rationale.

Work samples: Figma project

8. MAHE — Research and conversion-focused UX

University admissions experience explored through competitive analysis and a mobile-first journey. Focused on information hierarchy, admissions guidance, trust signals and lead-capture touchpoints.

Work samples: Figma project

9. TuteDude — Mobile-first UX

Mobile-web lecture experience designed around a 360px viewport and budget Android context, balancing video controls, notes, resources, support, progress visibility and course discovery.

VISUAL & BRAND DESIGN EXPERIENCE

Brand & Visual Designer | Inkdec - Independent Studio

Jul 2017 - Present | Freelance | International

Brand identity and graphic design for 50+ international clients across luxury real estate, premium F&B, logistics and consumer goods, including Upsilon Estate Bali, Time For Salad Brooklyn and Forus Logistics Germany. This background in typography, color systems, visual hierarchy and brand consistency informs the rigor applied to product UI work.

Selected visual work: Upsilon Estate Bali | Time For Salad

EDUCATION

Bachelor of Computer Applications (BCA) - Online Program

Expected January 2027

Additional: Self-taught practitioner with 8 years of professional design practice across UI/UX, product and visual design with international clients.
